Data Notes:

- Data obtained from the Missouri Department of Health and Senior Services - Adult Blood Lead Epidemiology Surveillance (ABLES) Program
- Counts based off of small cell counts of 0, 1, 2, 3, and 4 have been suppressed to protect patient confidentiality. In some cases secondary suppression was used to suppress rates based on cell counts >4 to prevent reverse calculation of totals to identify small cell counts.
- *Preliminary data
- $\mu\text{g/dL}$ stands for micrograms per deciliter
