Data Notes:

-This dataset was obtained from the Missouri Department of Health and Senior Services' Bureau of Health Care Analysis & Data Dissemination/Patient Abstract System.

-Data presented on this portal may differ from data for the same measure on State Tracking Portals, State Health Department websites, and other source websites. Refer to the Missouri EPHT Data and Statistical Guide for more information on the creation of this indicator.

-Rates have been calculated based upon residential address at the time of diagnosis. No information is available on prior residences.

-Geocoding accuracy, level of geocoding, and geocoding completeness may vary by time and space. This could potentially create geographically non-random errors in calculated counts and rates of CO hospitalizations.

-No personal exposure information is available, including smoking history, diet, or lifestyle.

-Age-Adjusted rates are calculated by using the 2000 Census Standard Population for 19 age groups.

-All rates do not include cases where the age was unknown.
