Data Notes:

- Data comes from the U.S. Census Bureau 2005-2009 Community Survey 5 year estimates. Table B08301. MEANS OF TRANSPORTATION TO WORK
- Data are based on a sample and are subject to sampling variability; More information regarding the source of this data is available at: http://www.census.gov/acs/www/data_documentation/documentation_main/
- This dataset only captures commute to work, and does not capture the distance or duration of the trip.
- Individual preference and economics also influences commute choices, not just community design.
- Commuting by taxicab or other means of transport not identified in the American Community Survey is not included in this indicator.
