

**Annual Rates of Hospitalizations from or with Asbestosis
Related Pneumoconiosis for Persons Age 15 and Older
per 1,000,000 Population in Missouri from 2003 - 2011**

Year	Missouri Annual Crude Rate of Asbestosis Related Pneumoconiosis per 1,000,000 Population	Missouri Annual Age-Standardized Asbestosis Related Pneumoconiosis Inpatient Hospitalization Rate per 1,000,000 Population	U.S. Annual Age-Standardized Asbestosis Related Pneumoconiosis Inpatient Hospitalization Rate per 1,000,000 Population
2003	71.1	67.4	54.6
2004	55.3	52.5	98.2
2005	68.4	64.6	60.2
2006	70.7	67.1	60.9
2007	81.1	76.5	61.7
2008	66.8	63.0	70.1
2009	61.6	58.3	48.3
2010	62.5	58.9	33.2
2011	60.5	56.7	----

Data Notes:

- Data obtained from the Missouri Department of Health and Senior Services - Bureau of Health Care Analysis and Data Dissemination (BHCADD)
- The hospitalization rates were calculated using the United States 2000 Census
- Data for the nation was obtained from the Council of State and Territorial Epidemiologists (CSTE). More information can be found at: <http://www.cste.org/group/OHIndicators>
- Workers' compensation eligibility criteria and availability of data from workers' compensation programs varies among states, prohibiting state-level data from being directly compared to other states or with national estimates

Annual Crude and Age-Standardized Rates of Hospitalizations from or with Asbestosis Related Pneumoconiosis for Persons Age 15 and Older per 1,000,000 Population in Missouri from 2003 - 2011
